EDUCATION

Bahria University Karachi Campus | B.S. in Software Engineering

Expected Graduation: May 2028

- o **Academic Status:** Completed 4th Semester
- o **Related Coursework:** Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Data Structures & Algorithms, Software Architecture, and Linear Algebra.

TECHNICAL PROJECTS

Dynamic Preview Generator (LeedOrg)

Karachi, Pakistan

Full-Stack Developer

June 2026

- Built a full-stack web application that allows sales teams to create custom website previews instantly for prospective clients just by using a custom URL slug.
- Sped up the mockup creation process by 99% by using CSS variables to dynamically change client brand colors and logos on the fly without any layout lag.
- Developed an automated Node.js data script that reads bulk business data from Excel files, cleans it up, removes duplicates, and saves it into a PostgreSQL database.
- Designed a private admin dashboard with real-time search, filters, and list-view toggles to help manage hundreds of business leads easily.

ReqaAssistant

Karachi, Pakistan

AI Tool Developer

Dec 2025

- Developed an AI-powered assistant that automates the software requirement gathering process, cutting down initial drafting times by roughly 40%.
- Built an interactive chat interface using Streamlit that asks users about their software ideas and automatically maps out their technical needs.
- Programmed the application to instantly take raw user answers and structure them into a formal, professional project requirements document.

Gym Management System

Karachi, Pakistan

Technical Team Lead

May 2025

- Created a desktop software application using Java to help fitness centers manage their daily administrative tasks and client records.
- Applied foundational Object-Oriented Programming (OOP) design principles like inheritance to write clean, reusable code structures for different types of users (Members, Trainers, and Staff).
- Designed a relational MySQL database from scratch and connected it to the Java application using JDBC to reliably handle payments, attendance, and member profiles.

ACTIVITIES AND LEADERSHIP

Bahria College Karachi NORE-1

Karachi, Pakistan

Deputy House Captain

June 2024

- Elected to lead student cohorts, manage inter-house activities, and collaborate with administration to coordinate college-wide events.
- Led the Tip House Computer Science team in a campus-wide technology competition, directing the strategy and project execution that secured 1st place.

SKILLS

Programming Languages: JavaScript, Python, Java, HTML/CSS, SQL.

Frameworks & Libraries: React, Next.js (App Router), Tailwind CSS, Streamlit, Java Swing.

Tools & Databases: Supabase (PostgreSQL), Firebase, MySQL, Microsoft SQL Server, AWS (EC2), Git, GitHub, Linux/Bash, Vercel.
